

Get started with Planday from Xero

Managing staff schedules and tracking their time worked can be tedious and error-prone as it relies on manual processes and may lead to incorrect staff payments.

Planday helps small businesses streamline their staff time-tracking, rostering, Award interpretation, and payroll, all in one place.

It's best suited for businesses with higher schedule variability & complex payroll needs.

Easy time and attendance tracking

Spend less time manually inputting timesheets and improve accuracy using Punch Clock and geolocation tracking to ensure your employees are being paid for the time they work.

Fast and flexible rostering

Use the online rostering tool to create rosters based on employee availability, training and costs. Plus, your employees will be able to swap, drop, and pick up shifts and request leave.

Pay staff accurately

Planday integrates with Xero Payroll for faster, more seamless, pay runs. This connection eliminates the need for manual data entry which saves time and helps to avoid costly mistakes.

Improve compliance confidence

Simplify rostering and pay staff more accurately with our built-in award interpretation tool.* Refer to the [Planday website](#) to see which awards are supported.

* Some award coverage exclusions apply.

Optimise staff costs

Easily monitor most labour costs against revenue each day to meet profit targets. Improve margins by connecting your POS to Planday so you can automatically compare actual sales against wages.

Connected staff

Keep staff up-to-date by sending secure in-app messages, company news or invites to events using the Planday mobile app.
